

Description

Remote phones are used by firefighters to establish communications with the master phone located in the main panel (PVC-MP). There are two different types of remote phone assemblies available. The most basic assembly is the PVC-FJ wall jack which provides a plug in connection for the PVC-FH portable phone handset. The PVC-TC-R cabinet is for storing the portable handsets when they aren't being used. The second type of assembly is the PVC-FS-R / PVC-WS-R cabinets that include a hard-wired phone that is always present. Product includes 5 year warranty.

PVC-FJ

PVC-FH

PVC-TC-R

PVC-FS-R
PVC-WS-R
