

## FIRE COMMAND CENTER DIGITAL PAGING ASSEMBLY

### Features

- Primary audio component of the Fike Emergency Communication System (ECS).
- Delivers optimum sound quality through a Class A audio network riser.
- Includes a Class A or B telephone riser.
- Compatible with CyberCat® 254 and 1016 panels (firmware v5.xx and higher).

### Approvals

Underwriters Laboratories (UL)  
 Factory Mutual (FM)  
 California State Fire Marshal (CSFM)  
 New York Certificate of Approval (COA)

*For exact certification listings, please reference the respective agency web site.*

### General

The FCC Digital Paging Assembly is the primary component of Fike's Emergency Communication System (ECS). It is the primary source of live audio messages distributed by the ECS system. The assembly includes an FCC Digital Paging Card, FCC Paging Control Card, and FCC Microphone Housing, all of which are mounted within the fire command center enclosure.

The FCC digital paging card provides the primary connection points for the ECS systems audio network riser, firefighter's telephone riser, integral paging microphone, and integral firefighter's telephone. The card also provides an audio input that facilitates the connection of a Mass Notification System (MNS) to the Fike ECS system for broadcasting emergency MNS events.

## Paging Control Card

The paging control card provides the following LED status indicators that allows the system operator to observe the status of the emergency communication system.

Switch/LED	LED Color	Function
<b>Local Page Active LED</b>	Green	<ul style="list-style-type: none"> <li>• Illuminates solid when control panel acknowledges switch press.</li> <li>• Turns off when page is cancelled via switch press or when a remote page with same or higher priority is initiated.</li> </ul>
<b>Remote Page Active LED</b>	Red	<ul style="list-style-type: none"> <li>• Illuminates solid when control panel acknowledges switch press.</li> <li>• Turns off when page is cancelled via switch press or when a local page with same or higher priority is initiated.</li> </ul>
<b>Power LED</b>	Green	<ul style="list-style-type: none"> <li>• Illuminates solid to indicate presence of power on FCC digital paging card.</li> </ul>
<b>Trouble LED</b>	Yellow	<ul style="list-style-type: none"> <li>• Blinks to indicate presence of trouble event associated with FCC digital paging card.</li> <li>• Illuminates solid when trouble event is acknowledged at associated control panel.</li> <li>• Turns off when trouble event clears.</li> </ul>
<b>MNS/ECS Active LED</b>	Red	<ul style="list-style-type: none"> <li>• Illuminates solid when control panel acknowledges activation of MNS contact input on FCC digital paging card (P4), or when switch assigned to an MNS function is pressed.</li> <li>• Turns off when contact monitor input is no longer active (non-latching), MNS reset is pressed, or MNS button is pressed a second time to cancel function.</li> </ul>
<b>Microphone Switch and LED</b>	Red	<ul style="list-style-type: none"> <li>• Selects FCC microphone as active paging source (default selection). <ul style="list-style-type: none"> <li>○ Associated LED illuminates solid to indicate switch active state.</li> </ul> </li> <li>• LED turns off when fire-phone page switch selected.</li> </ul>
<b>Fire-Phone Switch and LED</b>	Red	<ul style="list-style-type: none"> <li>• Selects FCC fire-phone as active paging source (local or remote phones).</li> <li>• Associated red LED illuminates solid to indicate switch active state.</li> <li>• LED turns off when microphone page switch selected.</li> </ul>

The paging control card provides ten (10) configurable switches with LED status indicators that allow the system operator to manually initiate live voice commands (paging) and manual messages via the emergency communication system.

Command Option	LED Color	Function
<b>Voice Alert</b>	Red	<ul style="list-style-type: none"> <li>• Places selected zone(s) into “alert” state, assigned alert message plays.</li> </ul>
<b>Voice Evac</b>	Red	<ul style="list-style-type: none"> <li>• Places selected zone(s) into “evacuation” state, assigned EVAC message plays.</li> </ul>
<b>Voice or MNS Page</b>	Red	<ul style="list-style-type: none"> <li>• Initiates page to selected zone(s) via system microphone or fire phone.</li> </ul>
<b>Voice or MNS Record Page (by zone)</b>	Red	<ul style="list-style-type: none"> <li>• Initiates a record-and-repeat page to the selected zone(s).</li> <li>• Uses the system microphone or fire phone to deliver live audio message to selected zone(s). <ul style="list-style-type: none"> <li>○ Message will be recorded and repeated over and over until canceled or over- written.</li> </ul> </li> </ul>
<b>Voice Page to Alert</b>	Red	<ul style="list-style-type: none"> <li>• Initiates page to all active alert zone(s).</li> </ul>
<b>MNS Reset</b>	Red	<ul style="list-style-type: none"> <li>• Resets MNS system (voice events not affected).</li> </ul>
<b>MNS Silence</b>	Red	<ul style="list-style-type: none"> <li>• Silences active MNS events (voice events not affected).</li> </ul>

## Specifications

<b>Mounting</b>	
<b>Options</b>	Firefighter's Telephone Housing
<b>Ambient Temperature</b>	0 - 49°C (32 - 120°F)
<b>Ambient Humidity</b>	93% Non-condensing @ 32°C
<b>Power Input</b>	15-30 VDC
<b>Current Rating</b>	103 mA standby (power LED on) 140 mA alarm (all LEDs on)
<b>Peripheral Bus</b>	
<b>Configuration</b>	Class A or B (no T-tapping)
<b>Format</b>	RS485
<b>Maximum Length</b>	4000 ft. (1,219 M) between devices
<b>Maximum Resistance</b>	96 ohms
<b>Termination</b>	100 ohm, Class B only
<b>Wire Type</b>	Belden 9841 or equal
<b>MNS Line Level</b>	
<b>Input Level</b>	1VPP
<b>Operation</b>	Triggered by MNS contact
<b>MNS Contact</b>	
<b>Rating</b>	5 VDC @ 2.1 mA
<b>Ground Fault</b>	0 ohms max impedance
<b>Termination</b>	4.7K EOL
<b>Configuration</b>	Normally open or closed
<b>Audio Network</b>	
<b>Configuration</b>	Class A
<b>Format</b>	RS485
<b>Maximum Length</b>	4000 ft. (1,219 M) between devices
<b>Wire Type</b>	Belden 9841 or equal
<b>Maximum No. of Devices</b>	128 connected components
<b>Phone Riser</b>	
<b>Rating</b>	24 VDC
<b>Configuration</b>	Class A or B (no T-tapping), 10K EOL
<b>Format</b>	RS485
<b>Maximum Resistance</b>	50 ohms per leg
<b>Maximum Capacitance</b>	0.5µF
<b>Wire Type</b>	Belden 5100FE or equal
<b>Maximum No. of Devices</b>	5 remote phones + local FCC handset

## Ordering Information

<b>Fike P/N</b>	<b>Description</b>
10-2751-R	Red Digital Paging Assembly
10-2751-B	Black Digital Paging Assembly
<b>Spare Parts</b> (items included in digital paging assembly)	
10-2727	FCC Digital Paging Card
10-2741	FCC Paging Control Card
10-2757-R	FCC Microphone Housing (Red)
10-2757-B	FCC Microphone Housing (Black)
10-2764	Cable, Digital Paging Card
