D

## A-C. Uni-Tag® Key Cabinets

Keys are attached to numbered key tags and filed on key rack slots for easy identification (key tags included). Slotted steel key racks hold key tags securely. When a key is loaned or issued, an "Out Key" control tag recording key number, key recipient, and date is filled out. "Out Key" tag is filed on same slot to provide key accountability. Alphabetical and numerical lock location data charts aid in organization. All cabinets are made of welded heavy-gauge steel with piano-hinged doors and key panels. Locking door includes standard disc tumbler key lock with two keys. Sand Color.

Master-keyed, keyed alike, dual-control, or combination locks are available for an additional charge. See page 16 for details. **No returns on MTO products.**

# Key Control Systems Two-Tag Key Cabinets

## A-B. Dupli-Key® Cabinets

Two different sets of key tags are numbered to make managing keys easy. Attach your master keys to red, self-locking key tags to make sure they remain on key hooks and your original key is never loaned. Fasten duplicate loaner keys to white, snap-hook key rings and file them on the same hook as the master key. When a loaner key is issued, insert a **Receipt Slip** recording the key recipient and date into a **Plastic Holder**, and hang with the master key. Log all issued keys into the **Key Loan Register** to keep a written record. All cabinets include a complete set of numbered key tags, receipt slips and holders, and key collection envelopes. A cross-reference binder contains instructions on how to establish your two-tag system along with three types of key indexes and a complete Key Loan Register.

Sturdy, welded steel with piano-hinged doors and key panels. Use on a table or shelf (mounting screws included). Cabinets include disc-tumbler lock with two keys.

 Master-keyed, keyed alike, dual-control, or combination locks are available for an additional charge. See page 16 for details. **No returns on MTO products.**
