Description

The Electron-Mechanical Horns & Horn Strobes combine state of the art electronics with the rugged proven durability of a mechanical horn. The combination of electronics and mechanics provide the maximum penetrating sound power while eliminating problems associated with mechanical contacts. The Adapter feature offers four field selectable candela settings - 15/75, 30/75, 75 or 110.

Detail - Adapter selector switch

All models remove the effects of inrush and RFI noise associated with contact operated mechanical devices. This design also eliminates the possibility of dust and dirt contaminating the contacts.

The construction of the horn and horn strobe allows for flush mounting on a standard 4-inch square back box or surface mounting on a 3046 or 3047 surface box.

Screw terminals are provided for the horn and strobe. The strobe can be configured to operate independently from the horn. The strobe has a Xenon flashtube with solid state circuitry for

Engineering Specifications

The audible/visual notification appliances shall be Faraday Series 6234, 6238, 6254, or 6258 Selectable Candela Strobe - Electron Mechanical Horn, or approved equal. The audible appliances shall be Faraday 6230 or 6250 Electron Mechanical Horns, or approved equal. The Series 6234, 6238, 6254, and 6258 visual segment shall be the Adapter Selectable Candela Strobe and shall be listed to UL1971 (Standard for Safety Signaling Devices for the Hearing Impaired). Audibles shall be UL listed under Standard 464 (Fire Protective Signaling). In addition to indoor applications, the 6230/6235 and 6250/6255 shall also be UL listed for outdoor applications, when mounted in a Faraday 3014 or 3015 Surface Box. All other appliances shall be listed for indoor applications, and shall be ADA/

NFPA/ANSI compliant. The strobe segment shall produce a flash rate of one (1) flash per second over the Operating Voltage Range Limits. The strobe shall consist of a xenon flash tube enclosed in a rugged clear polycarbonate lens. The strobe shall be of a low current design, and shall provide a minimum of four (4) field selectable strobe intensity settings, 15/ 75, 30/75, 75, and 110 candela. All settings shall be UL1971 listed for both wall and ceiling mount applications. The selector switch shall be tamper resistant. It shall not be necessary to remove the appliance from the mounting surface to select the strobe intensity. When strobe synchronization is required, the Strobe shall be compatible with the Faraday 5406 Sync Module, or other source of Faraday Sync Protocol, and shall not drift out of synchronization. Inputs shall be compatible with standard reverse polarity circuit supervision by an FACP.

The appliances shall combine electronics with the rugged durability and maximum penetrating sound power of a mechanical horn. To eliminate the effects of inrush and RFI noise, the appliances shall not have any mechanical contacts.

The Series 6230, 6234, 6235 and 6238 shall have a typical sound output rating of 96dBA at 10 feet. The Series 6250, 6254, 6255 and 6258 shall have a typical sound output rating of 100dBA at 10 feet.
