Analog/Addressable Heat Detector

SD505-HEAT

The SD505-HEAT is a heat detector suited to virtually any commercial setting. The SD505-HEAT is an absolute temperature device. This means that it generates an alarm if the temperature goes above the trip point (programmed at the panel).

The SD505-HEAT provides accurate temperature measurement data to the fire alarm control panel. This heat detector is particularly suited to environments where smoke detectors cannot be used because of the presence of steam or cooking fumes, such as in a kitchen.

Features

• Low profile, 2 inches, including base

• Absolute temperature device

• Simple and reliable addressing

• Uses digital communication protocol

• The SD505-AHS is UL Listed and meets the requirements outlined in NFPA 72 Inspection Testing and Maintenance, Chapter 7.

• CFSM listed

• MEA listed

• FM approved

Specifications

Operating Voltage: 17 to 41 VDC

Current Consumption:
  Alarm: .55 mA
  Standby: .55 mA

Detection Temperature Range: 135ºF to 150ºF
                               (57ºC to 65ºC)

Ambient Temperature: 32ºF to 120ºF
                       (0ºC to 49ºC)

Mounting: 4 SQR, 4"OCT Single gang mud ring

Rated Spacing: 70' between sensors on smooth ceilings
