SD365CO Addressable Combination Fire/CO Detector

The SD365CO is an addressable combination fire and CO detector that can detect and send separate signals for fire and CO. This multi-criteria detector uses four sensing technologies (photoelectric, infrared, heat, and CO) to accurately detect fire and CO alarm conditions with a high immunity to false alarms. When paired with the B200S-WH sounder base or B200S-LF-WH low frequency sounder base, the SD365CO can generate unique alarms for fire and CO events (bases sold separately). Now available with a modern white finish and a 10-year CO cell. Compatible with the ES-50X & ES-200X addressable fire alarm control panels.

SD365CO Addressable Combination Fire/CO Detector Features and Benefits

- Detects both life-threatening Carbon Monoxide (CO) leaks and fires in one device
- 10-year CO cell life span
- Eliminates the need for separate detectors and additional hardware
- New modern design with white finish
- Low standby current
- Rotary address switches for fast installation
- Meets UL 2075 & 268 for CO detection
- Compatible with ES-50X & ES-200X
