1451 Ionization Smoke Detector Discontinued

July 1, 2009
Document FLPR09-7-1

Dear Valued Customer,

We have been advised by System Sensor that the **1451** conventional plug-in ionization smoke detector is being discontinued as of September 30, 2009 due to historically low sales volumes. The replacement product for this model is either the 2151 conventional plug-in photoelectric smoke detector or the i³ series of detectors.

Please anticipate any future need for the 1451 ionization smoke detector and place your final orders as soon as possible. All orders will be fulfilled on a first-in / first-out basis while supplies last.

We appreciate your cooperation during this transition. Please contact your Regional Sales Manager or Fire-Lite Customer Service Representative at 1-800-627-3473, if you have any questions regarding this announcement.

Thank you for your continued business.

Sincerely,

Bill Brosig
Fire-Lite Product Manager
