

# Polycarbonate Enclosures with Alarms

## PRODUCT OVERVIEW

Multipurpose transparent UV-stabilised polycarbonate enclosures offer excellent protection for a wide range of different equipment including fire and security control panels from vandalism and accidental damage. Available with choice of audible siren alarm or strobe/siren alarm, and thumb or key lock.

## HOW IT WORKS

External mounting tabs allow the enclosures to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. They come complete with mounting accessories and tamperproof screws. All models supplied with coated steel internal mounting backplate.

## KEY FEATURES

### General Information

- Multipurpose transparent polycarbonate enclosures designed to protect fire and security control panels and other electronic equipment which require physical protection.
- Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

### Design

- Design allows visibility from almost every angle.
- Cost effective, low maintenance, compact and lightweight design.

### Construction

- Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage to control panels and other electronic equipment.

### Installation

- External mounting tabs allow the enclosure to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment.
- Complete mounting accessories and tamperproof screws are provided.
- Typical working properties of polycarbonate are -40°C to 121°C (-40° to 250°F).

### Electronics

- Choice of 95db audible siren alarm or a 100dB strobe/siren with flashing beacon, both powered by a 9V PP3 battery.

### Options

- Choice of thumb or key lock.
- Additional eyelets allow the use of a secondary safety seal or padlock.
