

8MP panoramic 180° full color turret camera**System:**

Comparing to the TD-64x4M3 series professional panoramic cameras, the IP-5DT8E3N2-36 is a fresh design that target to economical class level.

Features:

- **High resolution with triple streams**

Stitch dual 5MP video modules into one camera, providing great details, output max 7.37mega pixels and triple streams.

- **Less freight, quick deployment.**

One MAC address, one housing, one bracket, one cable. Wire once, configure once and maintain one camera. Quick deployment saves installers 50% efforts. The panoramic has built-in bracket that could handle most indoor situations and also has rich accessories that could be chosen for outdoor mounting. In most case, it could just wire one RJ45 cable to PoE source device and no extra power adaptor required.

- **Large monitoring area without vertical blind area**

Two 3.5mm lens with 5MP sensor, provide a large monitoring area, which can identify human face at 6.3m, recognize human face or license plate at 13m and observe human behaviors at 25m. Besides its 180° horizontal view, the vertical 65° view which provides no blind zone for a critical surveillance project, such as criminals or animals crossing window or side wall. One pcs camera could cover a corridor at 4m(W)x10m(L) without blind area. Two pcs of such cameras, back to back installation, could cover a square about 20m (W)x20m(L) without blind.

- **Full color**

Two F1.1 large aperture lens plus 2.2um big pixel sensor provide vivid, clean and clear image at most scenes. In pitch black environment, the warm light LEDs automatically turn on to provide skin, fur, hair and dress color information as court level evidence. The white LEDs support smart-light algorithm to automatically adjust their brightness according to ambient light, which avoid stimulus and complaints from neighborhood.

- **Multiple VCA functions.**

Built-in deep-learning engine supports face, human and vehicle detection, classification and identification at real-time and the 1.5TOPS high computing power supports multiple VCA functions such as loitering, crowd density, perimeters, etc.

- **Built-in audio peripherals**

The camera has built-in MIC and speaker, which could spare external audio devices in most cases. The build-in speaker could broadcast pre-defined warning voices immediately upon events happened and reach up to 30m distance.

- **ONVIF, API and SDK**

Confirm Onvif specifications, interoperability between network video products, regardless of manufacturer.

- **Rich Interfaces**

External TF/Micro-SD Card, Alarm and Audio interface, further extend device capacities as needed.

- **Strong protection**

This camera has full metal housing, IP67 water ingress, IK10 vandal-proof, 6KV lightning protection which is suitable for 7x24Hours indoor and outdoor harsh weather working.

- **Data protection & Regulations**

This camera is enhanced data and privacy protection, such as secure boot, web log, strong password, digest signature and authorization, HTTPS, SSL, TLS1.2 protocols, which are compliant with NDAA and other major regulations.

Application:

High-level surveillance application of area intrusion, perimeter protection, which requires no blind zone and full color for 24Hour, such as jail, bank, jewelry store, medicine store, financial office, chemical lab. Suggestion installation height: 3m
