

DC Power Supplies

For Smoke and Carbon Monoxide Alarms

9V Battery Power, AA Battery Power

**9V
Power Supply
2 Pk**

**AA
Power Supply
4 Pk**

*Guaranteed to power a Kidde alarm for 2 years or we will replace it!**

Description

Not all batteries are manufactured to the same specifications, and use of the wrong batteries can have detrimental effects on smoke and CO alarms. While approved battery models are specified with Kidde product, the battery replacement experience is now simplified with the introduction of Kidde brand 9V and AA Alkaline batteries. Kidde batteries are suitable for all Kidde smoke and carbon monoxide alarms, and are guaranteed to last for two years. (See specific terms and conditions). The two year warranty does not include combination smoke/carbon monoxide alarms.

**This is not a battery performance claim. See product packaging for specific terms and conditions*

Product Information

Each masterpack of Kidde batteries is shipped in a tray and lid configuration and contains five sellable units. Part number 21026967 contains 5 blister packs which each contain two 9V batteries. Part number 21026968 contains 5 blister packs with four AA batteries each. Retailers have the option of utilizing hang holes for peg placed merchandising, or using the included cardboard tray for shelf placement.
